

THE REALITY GAP LIST

one page per decision point · 3–7 rows

Signal	Score V / A / U	Pattern at risk	Independent check to confirm it	Needed before

Independently verify a signal if it is decision-critical AND scored Asserted or Unknown; everything else stays with normal reporting.

Appendix A • Template 1 — The Reality Gap List. *Fill only for the signals your next decision stands on. A gap that closes after the decision closed nothing.*
